Application/Control Number: 09/683,474

Art Unit: 3616

DETAILED ACTION

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the belt tensionser (claims 10 and 15) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: On page 6, line 6 "18," (first occurrence) should be deleted.

On page 7, line 10, "in extending downward" is not clear.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 12, 14-17 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 should end with a period.

In claim 14, there is no antecedent basis for "its respective reaction point".

Application/Control Number: 09/683,474

Art Unit: 3616

Claim 20 should begin with a capital letter.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 7. Claims 1-4, 8, 11-12 and 18-19 as best understood are rejected under 35 U.S.C. 103(a) as being unpatentable over Townsend et al in view of Kohlndorfer et al.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Townsend et al (note guide 24 moving rearward from a comfort configuration to a position it would be in during a crash situation) to include a lap belt fastened at each side of the seat and shoulder belt as taught by Kohlndorfer et al in order to use a conventional prior art belt (see Figure 1 of Kohlndorfer et al) (claims 1, 3-4, 8, 11-12 and 18-19).

Art Unit: 3616

Regarding claim 2, a control system or module would control Townsend et al's cycle at column 4, lines 39-40:

8. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Townsend et al in view of Kohlndorfer et al as applied to claim 1 above, and further in view of German Patent Document 2,403,356.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Townsend et al and Kohlndorfer et al to include a pretensioner adjacent the seat as taught by German '356's member 24 in order to conventionally tension the belt.

Allowable Subject Matter

- 9. Claims 5-7, 9, 13 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 10. Claim 14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
- 11. Claims 15-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Application/Control Number: 09/683,474

Art Unit: 3616

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Japanese Patent 56-21930 discloses a breakaway seat belt support.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric D Culbreth whose telephone number is 703/308-0360. The examiner can normally be reached on Monday-Thursday, 9:30-7:00 alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on 703-308-2089. The fax phone numbers for the organization where this application or proceeding is assigned are 703/746-3508 for regular communications and 703/308-2571 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
